

DEPOSITORS

Depositor XRS Series

For dough depositing on an Industrial Scale, CMC-America proudly manufactures the XRS series. Custom manufactured, with depositor head widths of up to 1.2 meters, the XRS is specifically for large-scale production. It can also be applied to frozen dough or cluster pack depositing across a wide variety of recipes. Our smallest XRS can move from 1 tonne to 2 tonnes of dough per hour. The unit forms, weighs and places – in a uniform array – dough pieces onto paper for transfer into freezing for subsequent layered packaging or right onto baking bands for instant production.

1 Custom Manufactured for Serious, High-Volume Operations.

We have designed and delivered XRS units in three widths: 24"/630mm, 32"/800mm, 39"/1 M and 47"/1.2M. Wire cut dough pieces are placed directly onto oven bands, or waxed paper, ready for baking, packaging or freezing. The unit is perfect for Cookies, Scones, Biscotti, Brownies, and Biscuits. Call us to discuss your needs.

2 Sanitary, Safe & Easy to Use with Low Cost of Ownership.

We designed the latest sanitary standards into the XRS with: stainless steel 50 qt. hopper, conveyor bed plates, shafting and stand offs and Aluminum feed rolls, filler block dies, die holder and zone components. The XRS is BISSC approved and USDA accepted. Sanitary wash down design elements are central to the machine's design as all moving parts are no-tool removable and dishwasher-safe. Pressure grease fittings are permanently sealed and composite ball bearings are included. Lubrication and maintenance are simple and safe. The XRS conforms to OSHA guarding, ANSI Z50 and is UL listed.

3 Total Control

The XRS is touch screen controlled with Baldor 'Smart Move' 2 axis control teamed with precise control Servo drives. Optimal settings for production runs can be saved and stored as programs for easy repeat use. Both the conveyor belt and the feed rolls operate on variable speed drive. The XRS boasts exclusive, aggressive feed rolls to provide consistent dough feed for a wide variety of products.
