

WATER METERS

Water Meters DA 150

In busy commercial bakeries, every baker must multitask. We made the DA 150 for the baker who needs remote control dependability on water volume and temperature -- and has no time to monitor delivery. The DA 150 delivers up to 100 lbs. of water per minute. When paired with the (optional) Thermostatic Mixing Valve, this water is delivered at the right temperature for your recipe.

- 1 Easy to Control**
The unit boasts up to 10 program settings and up to 2 mixer controls. Temperature can be controlled manually or via thermostatic water temperature controls. Water deliver can be halted and resumed with no fuss.

- 2 Temperatures Up to 120° F. Accurate & Dependable**
The DA 150 can deliver water in temperatures up to 250° and is accurate to within +/- 1% when running at 100 lbs./min.
